Sir:

In response to the official action mailed May 8, 2001, please consider the following remarks and materials.

The Examiner has refused entry of the substitute specification on the grounds that neither a fully marked up copy nor a clean copy have been submitted. Applicant submits that a clean copy was submitted, and resubmits such a clean copy together with a marked-up copy showing the changes from the specification as filed.

Claims 1, 7-8 and 13-14 are rejected under 35 U.S.C. Section 112, first paragraph, as containing subject matter which is not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The Examiner states that the algorithms for calculating a negative variability of return for each of the funds, calculating an adjustment for the negative variability of returns, and calculating a low and high expected annual return for each fund are not disclosed.
